Capstone

In this capstone course, the student is expected to synthesize and integrate the conceptual and theoretical knowledge and understanding, as well as skills acquired in the curriculum through course work, internships, leadership development, research, and other learning activities. The emphasis is on the student’s demonstrated development and competency of applied environmental leadership skills and written analytic material that can be utilized for individual student assessment and program assessment. Students are assessed on their professional report and formal presentation of their applied environmental leadership project during this semester. Course fee (for spring intensive). Required for MA Resilient Leadership: Sustainable Systems track.

Course Number: ENV785
Unit: 3.0
Program: Environmental Studies
