

Deep Ecology

This course serves as an exploration of the philosophical dimensions of the human/nature relationship. While deep ecology serves as the primary framework for this exploration, other approaches, such as ecofeminism and social ecology, are considered. Deep ecology alternatives for addressing ethical and ecological problems are examined, along with options for effective and compassionate action. Prerequisite: COR115. Required for ENV majors.

Course Number: ENV318

Unit: 3.0

Program: UNDG Envrnmtl Studies
