

## Ecopsychology Applied in Context

This online course deepens understanding about the field of ecopsychology by seating its concepts in cultural and applied contexts. Application of the ecopsychological principles for addressing contemporary ecological problems and ethics are examined, along with options for effective and compassionate action. Topics may include eco-spirituality, power dynamics and diversity in ecopsychology, ecofeminism, applied myth, climate change, bioregionalism, voluntary simplicity, and resilience.

Course Number: PSYE690E

Unit: 3.0

Program: GRAD Ecopsychology
