

Physical Geography: Beholding the Body of the Earth

Deepening our natural understanding of the earth as a living system, this course explores Gaia Theory and the new cosmology of the earth that is emerging in science. Within this framework, we explore the formation of the earth+geomorphology and geophysiology+or one could say the "digestion," "circulatory," and other systems of Gaia. This new vision in Western science can reawaken understanding and reconfirm our commitment and reciprocity with the earth.

Course Number: ENV100

Unit: 3.0

Program: UNDG Envrnmntl Studies
